Gary, attached is what I have so far on the Draft Proposed Plan for the Site.

The human health and ecological risk assessment portions of the Proposed Plan include the input/comments I received from the risk assessors. The only input I provided for these sections of the Proposed Plan were introductory statements and the uncertainty analyses.

Gary, you may want to begin reviewing all portions of the Proposed Plan, except the risk assessment portions, and let me know what you think. Dipanjana, can you please look at the human health portion to make sure I included all of your comments. It is my understanding that Susan will be providing additional comments on the eco sections.

Note that I have included "?" marks for those sections that will require your input depending on the date and location of the public meeting.

Concerning FYRs, would the review for the Site be considered statutory or policy? I included policy reviews in the draft based on the conference call we had with HQs' staff, but I'm thinking they should be statutory.

Attached is the entire Draft Proposed Plan in pdf format. I have also included the MS Word file, of the text, and the two figures of the Proposed Plan in pdf format.

I will be on flex Thursday and Friday, so call me on my cell phone at (817) 832-8209 to discuss how to proceed with amendments to the draft Proposed Plan, or we can meet with the Site team on Monday May 30th, or later, at the office.

It may be more efficient for me to make the changes and add additional comments to the Proposed Plan, since changing one portion of the plan may require changes to other parts. One author is always best for consistency. Let me know how to proceed.
